

RIFLES 2018

DAS ORIGINAL

NO DOUBT...

Imagine living on a deserted island for a year, where winters reigned supreme, filled with snow, ice and freezing cold. Burning summers would give way to monsoon rainfall, turning the dusty landscape into a muddy morass. The only game to hunt is tough and dangerous. You have one rifle and only 100 rounds of ammunition with which to survive. No cleaning kit, no tools, nothing. What rifle would you choose?

We've asked this question of many hunters over the past few months, and the most common answer, by a long way, is "Mauser 98". Hardly surprising, considering the M98 has earned its name as the ultimate rifle in terms of reliability under any circumstances. There's a good reason the M98 has been the blueprint for so many rifle designs around the world, though none has come close to the original.

For us at Mauser, the M98 represents far more than simply a rifle. It is an inspiration in the way we think, build and enhance our guns today. We build rifles that are hunting tools with no bells and whistles which are second-to-none when it comes to function and reliability. When it really matters, there's no doubt that you can only count on...

...THE ORIGINAL.

MAUSER

Born from genius, forged by
gigantic hammers, built for
eternity. The story that started
in 1898 is stronger than ever.
MAUSER remains true to its
genesis and continues
to make the most reliable
firearms in the world.

M 988

○ The time has come for the original to be manufactured at home: at MAUSER. As with no other rifle in our history, the M98 action defines the core value of the MAUSER brand and fires our mission

to build guns that never let their owners down. The entirely new M98 line is not only a unique combination of technology and craftsmanship, but a true commitment to our roots as the birthplace of the world's most reliable rifles.

M98 STANDARD

After a comprehensive study of the original drawings and with developments of 21st century gunmaking techniques, we knew there could only be one outcome: the best. From the start it was about optimization rather than improvement of the best bolt-action rifle ever designed. The best materials, the

unbeatable precision of high-end modern manufacturing, state-of-the-art surface technology, masterful assembly and the final touches by our expert gunsmiths – this is what sets the rifle apart. After two years of hard, intense work, the new MAUSER M98 STANDARD represents a milestone in custom rifle making. The

MAUSER M98

M98 DIPLOMAT

The benchmark for custom hunting rifles. Every detail is 100% Mauser and thanks to the grade 7 wood, this is the cream of the crop.

M98 EXPERT

A tasteful entry into the world of the M98, with a classic design perfected. Every rifle is a unique piece.

receiver is milled and drilled from a single massive forged block of specially formulated steel; the barrel is cold-hammer forged; the trigger is optimized and has outstanding characteristics; the steel surfaces have been plasma-nitrided; there are front sling-swivel studs as well as iron sights mounted with

barrel rings and to top it all off, there is a three-position horizontal style safety with ultra-smooth function. Every rifle is handcrafted and fitted to perfection. How cycling the bolt feels proves we have achieved our goal. We have successfully and rightfully brought this legend back into production.

M98 MAGNUM

Africa's legendary big-game hunters knew what to trust: the mighty double or, with its larger capacity, the magazine-fed indestructible and reliable Magnum MAUSER action. Staying true to this tradition, the new M98 Magnum shows there is no challenge too great for this rifle. Based on a double square bridge

action made from a full block of steel, this big-game classic is delivered to the same exacting specification as the M98 STANDARD. Two massive recoil bars and a slightly longer stock are incorporated to deal with the three calibres on offer: .375 H&H Magnum, .416 Rigby or .450 Rigby. A big-game hunter can rest

MAUSER M98

M98 MAGNUM
When the top of the food
chain needs to be decided,
this rifle is your
ultimate partner.

assured that with the M98 MAGNUM in his hand, he'll have the uncompromising firepower of five (.375) or four (.416 or .450) cartridges in the magazine to tackle the jobs a double rifle can't. Thanks to the legendary long extractor, the controlled feed and the fantastic bolt cycle, this power is delivered with speed

and absolute reliability when your life may truly depend upon it. Not only will a M98 MAGNUM hunter enjoy the final pull of the trigger with this unreserved classic but the journey to get there will become as much a part of the story. Who wouldn't want to carry one of these hefty brutes in the African bush?

**YOUR HUNTING,
YOUR RIFLE**

NEW

NO COMPROMISE!

The new Mauser M 18 condenses hunting to its fundamental form: pure, no-frills workmanship. It's not merely a hunting rifle, but something which Mauser has always symbolized: the ultimate gun for all men at all times. The Mauser M 18 is more than just another component; it is the whole package. It brings together all the essentials for hunting in the best possible way and does not include anything that isn't necessary in the field. The result is a genuine tool for genuine hunters with a sensational price-performance ratio. In other words: Mauser brings you: "The People's Rifle".

Uncompromising
durability

M 18

NEW

The brand new M 18 embodies „Made in Germany“ with the soul of a Mauser: Ultra-sturdy construction made of the best materials, concentrating on the essentials for its purpose: Solid three-lug locking system, cold-hammered barrel, and a silently operating 3-position trigger lug safety system. In addition, the M 18 shines out with its adjustable, crisp direct trigger mechanism and its removable 5-shot magazine.

Unique in its price class is the ultra-robust synthetic stock, which comes with two unbeatable trump cards: Firstly, the most modern „1+1 C“ technology integrated soft-inlays in the pistol grip and the forearm, they guarantee you the perfect grip in every situation. Secondly, the butt plate which can be removed without the use of tools. In this way, you can to gain access a useful storage space in the stock.

A collage featuring a photograph of a wilderness landscape. The background shows a dense forest of evergreen trees on a hillside, with a field of dry, brown grass in the foreground. A piece of torn, aged paper is pasted over the bottom left of the image, containing text. The paper has a rough, deckled edge. The overall composition is layered, with the photograph and the torn paper overlapping each other and the underlying page.

Wilderness hunting inside
the Arctic Circle, far
north in Swedish Lapland.
No roads, no civilization,
no plan B. Here you will
need all of your skills,
determination and the most
reliable hunting equipment.

MAUSER

IMI 12

More than ready to hunt.
Waterproof clothing,
well broken-in boots,
a birch bark moose call
and the indomitable
Mauser M12.

HARD SHELL, HARD CORE

The M12 has everything MAUSER represents: tough use in any condition. With a proven full steel construction, cleverly designed cold-hammer forged barrel made of a specially formulated steel, direct lock-up of the bolt inside the barrel with six massive lugs, detachable high capacity magazine and

a safety concept that showcases what the MAUSER philosophy has been for more than a century. Time doesn't stand still, however and so the M12 optionally offers a precisely designed and produced manual cocking system that combines maximum safety and the easy and well known MAUSER-style operation.

Firing pin safety

Optional
Manual cocking
safety system

All these unquestionable advantages prove their truly uncompromising practicality especially when unexpected circumstances force man and material to the limit and when compromise or defeat

is not an option. It is then that a real hunting rifle must do its duty, when the last reserves are being used to conclude the adventure that was started hours or even days before.

After seven hours of walking and stalking we are within calling range of a big bull. We have to seal the deal and drop him - we need meat for the camp...

M 12 TRAIL

Compact reassurance. Thanks to the feedback from skilled dog handlers and beaters during the development phase, there is no doubt that the cleverly designed TRAIL model is best suited to active hunting. The 47cm barrel has a three-dot driven hunting sight, and the rifle has an overall length of 97,5 cm.

The black Ilaflon coating on every steel part guarantees the ultimate rust protection, while the sling-swivel at the muzzle has 360 degree rotation. There's a practical extra sling-swivel stud on the side of the stock and the Soft-Touch polymer stock in blaze-orange completes this reliable professional tool.

MAUSER M12

M12 TRAIL

Every metre covered in this thick brush or on a tricky blood trail is a testimony that this is no hobby, it is a passion: just like the M12 TRAIL.

M12 EXTREME
Rain, snow, dust or dirt: it doesn't matter how tough things get, this work-horse of a rifle is tougher.

M12 EXTREME

The toughest all-rounder on the market, the EXTREME, has an ultra-robust build and an almost indestructible polymer stock. For perfect control in any situation, MAUSER has included a Soft-Touch coating as well as an oversized bolt-knob. The EXTREME is available in

all standard and magnum calibres of the M12 portfolio, making this rifle the only choice if you have to deal with hardcore weather or are going on a challenging international hunt in the back of beyond where technical issues are not a possibility.

A call brings the bull in, he senses something is wrong and runs back towards the forest. Suddenly he stops, almost broadside, 200m away. With the M12 MAX, there's no doubt...

M12 MAX

High stability and ruggedness are combined with cleverly designed ergonomics: the M12 MAX masters both with excellence. The carefully designed thumbhole stock ensures perfect trigger control, while the palm swell on both

sides of the stock allows for right or left-handed natural shooting. The laminated beechwood stock is sealed with a special finish to offer maximum weather resistance and enduring reliability for the accurate shot in any situation.

MAUSER M12

M12 IMPACT

The best shot can often be the result of a long walk. The IMPACT is second-to-none for combining a compact hunting platform but with match accuracy.

M12 MAX

The new flagship rifle in the M12 line and the most ergonomic MAUSER in production. The result? Maximum performance and reliability for static shots leading to optimal results.

M12 IMPACT

The IMPACT redefines the M12 as a top-level long-range hunting rifle. Not only does the design focus on long-distance shooting, it also addresses the arduous, often steep stalk into position that is needed in a real world scenario. A unique

design offering compact dimensions, light weight and ultimate accuracy with perfect balance. The silver Ilaflon coating protects every steel part from corrosion and the cone shaped bolt handle provides smooth reloading, even when prone.

M 12 PURE

“Back to its roots” explains the entirely new design of the M 12 PURE. A century ago, M 98 rifles with sporterised high grade stocks were the choice of professionals who desired reliability in a stylish package. What could be better than fusing an ultra-reliable infantry action with a classic hunting stock?

This turned a functional edgy military firearm into arguably the most awesome stalking rifle of all time! The M 12 PURE picks up this success story and is a true Classic Sporter that will excite every real hunter without breaking the bank. This is how MAUSER presents modern day affordable luxury that works.

MAUSER M12

M12 PURE
The name says it all: from butt cap to muzzle, this rifle makes a clear statement: MAUSER at its very purest with DNA reaching back to 1898!

M12 EXPERT
A classic outline and the best materials make the heart and soul of this indestructible rifle. Like hunting, the EXPERT doesn't follow fashion, but embodies a living tradition.

M12 EXPERT

The "noble sister" of the PURE is delivered with the same Sporter stock with a straight comb, long pistol grip, German cheekpiece and the characteristic MAUSER trapezoid right over the trigger. It is the specially selected grade-5 wood and ebony tip at the fore-end that lift this

rifle to the next level, leaving no doubt that a gun with such classic form and such excellent function can only carry one name on the receiver: MAUSER. This is not just a special occasion rifle, this is the rifle you will love to look at and hunt with every time it leaves the cabinet.

MAUSER

This is your hunt. This is your life. Make it happen! Hunting is so much more than simply a hobby, just like your gun is so much more than just a bolt-action rifle.

M03

MAUSER M03

The camp is made, the firewood is ready. The stalk will provide dinner under wild skies.

FOR EVERY DAY AND EVERY CASE

The MAUSER M03 is the premium modular bolt-action rifle for any game, on any hunt, whether home or abroad. A quick and easy change of barrel, bolt head and magazine can alter the M03 platform from a delicate roe deer set up to a fast pointing driven hunt rifle then

to the most powerful big-game felling brute. No matter what configuration is put to the shoulder, any M03 hunter can count on two facts: 100% return-to-zero accuracy and uncompromising performance in any circumstance. Thanks to the wide range of available

calibres, as well as a multitude of barrel lengths and tapers, the M03 can be configured to suit any hunter's needs. Moreover, every combination provides state-of-the-art action, manual cocking safety, a versatile set trigger and a metal detachable magazine – all in the timeless

design of a true MAUSER. The M03 represents the best of modern innovation but with genuine recognition of MAUSER's past continuing in the legacy of reliability, tough form and devastating function. This is a rifle every serious hunter should take into consideration.

M03 EXPERT
Imperious technology meets classical beauty. EXPERT: the supreme choice for those who need the very best in modern bolt rifles.

M03 PURE

The brand-new model is in the upper echelons of rifles MAUSER has produced, offering two benefits: technicality and beauty. The PURE offers the latest in technology, with the full line of configurations available, including a set trigger, as well as the MagSafe magazine lock. A brand-new design that is true to

the unique beauty of MAUSER rifles offers a German cheekpiece, a distinguished line around the magazine frame and a fluid outline towards the fore-end tip. These features give this M03 model a dynamic feel of a true MAUSER sporting rifle that excites in every hunting situation .

MAUSER M03

M03 PURE
Innovation and accuracy
in its most genuine form
from MAUSER. The pure joy
of hunting.

M03 EXPERT

Black plasma-nitrided steel parts and specially selected grade 5 Turkish walnut distinguish the EXPERT: this is an elegant classic formed hunting rifle for the gentleman who expects technology in a class of its own. Under the noble

exterior this is one of the most modular and reliable bolt-actions in the world, with all the technical must-haves that a connoisseur would expect from a safe, accurate and versatile 21st century premium sporting rifle.

The perfect day: a successful hunt, no reception on your cell phone and the chance to sit by the fire looking at the beautiful engraving on your M03.

M03 DIPLOMAT

Since the early days of gunmaking, embellishing firearms has been a sign of admiration towards a trusted and proven tool that has ensured a successful hunt. The DIPLOMAT line stays true to this tradition and pays it due respect. Outstanding engravings by renowned German artists embellish the receiver,

bolt and magazine floor-plate, with ornaments of fine English scroll-work, traditional oak leaves and the power of Celtic patterns. The Magazine floor-plate can, upon request, include game in your favourite hunting scene, making your rifle even more unique personal and a joy to use.

MAUSER M03

M03 EXTREME

When you are hunting to the limits, this M03 is the rifle of choice. Made from almost indestructible polymer, even the heaviest of impacts will only scratch the stock – but won't bring it down. This protection is tailor-made

for the EXTREME, and those who seek adventure can take this rifle literally anywhere. Whether sub-zero arctic tundra to high altitude low oxygen mountain hunts, this M03 configuration is about as reliable as they come.

MAUSER M03

M03 EXTREME

Modular, for the toughest travelling rifle. Professional and international hunters in particular trust in the ruggedness of this premium rifle.

M03 TRAIL

The short answer to long hunts. Since its launch, the TRAIL has been the practical and safe choice of ambitious dog handlers and beaters.

M03 TRAIL

Hunters that carry a M03 TRAIL are the ones that actually do the hunting, not just talking, and with a rifle they can count on. The facts: rugged manual cocking safety that is easy to use with gloves; lockable five round magazine; 360

degree rotating sling swivel at the muzzle; additional sling swivel stud to the side of the stock; muzzle safe protection system, and last, but not least, a polymer stock with orange inlays that offer perfect grip. This is 99 cm of tool, not talk.

MAUSER ACCESSORIES

1

2

3

4

THE REAL LOCK, STOCK AND BARREL

1) MAUSER DUAL-BRAKE:

Reduces recoil and barrel jump up to 30 percent.

2) MAUSER Moderator: Rugged and efficient. Made by the pros from A-TEC it lowers noise, recoil and barrel jump to a level that makes shooting a pleasure.

3) MAUSER Gun Slings: Your choice between the black EXTREME or the leather-sling DE LUXE.

4) MAUSER Hexa-Lock: Available for M12 or M98 Std. and with 1"- or 30mm-rings it is the stable and 100% "back to zero" connection between rifle and scope.

5) MAUSER Cordura Soft Bag: With additional pocket and combination lock.

6) MAUSER Gun Case long: For an assembled M03, M12 or M98.

7) MAUSER Double Square Mount: The elegant and stable scope mount for the M03 and all types of scopes.

8) MAUSER Muzzle-Safe: The perfect protection for the muzzle.

9) MAUSER M03 Short Case: Either for one rifle plus scope or for rifle, spare barrel and a second scope.
